- Seminar on “In Search of Energy-Efficient Mobile Networking”

PROJECT UNDERTAKEN DURING ACADEMIC

Mini Project: “Robot Animation”

Description: Robot Animation is a 3D project. Robot performs the job as it is done by human beings. In this Project I have implemented different movements of human body like a hands and legs and I have implemented how the robot protects itself from the environment changes. I have implemented rotation, animation and lighting by using computer graphics concepts.

Project: “OOD Secure Code Dissemination with Fountain Codes in WSN”

Description: In WSN Code Dissemination is an important technology to remotely add new functionality or fix bugs after the sensor is deployed. Most code dissemination protocols are Deluge based which have to take much energy and memory to deal with problem caused by Out-of-Order-delivery of packets in WSNs. We have implemented code image confidentiality, bogus code image protection, DoS protection and Out-of-Order-delivery-tolerant property.

NON TECHNICAL STRENGTHS

- Time Management and Positive Attitude
- Ability to Interact with Team for gathering Knowledge effectively for Analyzing and solving problems
- Willingness to learn quickly, Hard worker and Self-motivated
